Investment risks
Trading cryptocurrencies have a high level of risk and isn't fitted for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

01. INTRODUCTION

Squid Coin is a community token based on games that were created primarily to provide a haven for game enthusiasts. Our major purpose is to provide users with a safe and secure environment where they may use their crypto for rewards, storage, and the purchase or sale of NFT. We focus on the demands of our gamer community members as a gaming community-generated token.

Squid Coin is a new next-generation gaming platform. The primary distinction between Squid and traditional games is that our players are rewarded for their contributions to the ecosystem through the use of Blockchain economic design. This new gaming model has been dubbed "play to earn." Thousands of players from developing countries have joined Squid in search of a new source of income during the Covid pandemic.

Squid Coin launches a game that is based on our global auto-translated platform. Anyone from all around the world can enjoy it without a language barrier. But to earn coins gamers have to participate in games and need to survive in metaverse games.

Squid coin offers IDO, IDOs offer businesses a tool for engaging their communities in an economy that both enriches their products and services while allowing them to make smart business decisions regarding their assets.

We provide gaming services without the use of a human or business intermediary. The system is safe, and the software and transactions have been proven to be trustworthy and fair. When you consider how simple it is to earn money by playing the Squid Coin game, it's clear to see why Squid Coin Gaming is the gaming token of the future.

02. Mission

- Our goal is to combine gaming with cryptocurrency by creating a user-controlled ecosystem that allows users to transact both ways using our token, allowing gamers, investors, and content producers to make money while immersed in a unique world.

- Squid coin intends to break down barriers in the gaming industry by allowing players to stake and trade with the squid currency inside the game's marketplace. Here, players can sell items they've discovered, made, or earned throughout the game to one another.

- Our games will always be free to play, and owing to our novel tokenomics and tax structure, they will also let players or users earn money while playing. We see a future in which wealth-building tactics that were previously only available to the wealthy are made widely available, restoring people's authority over their financial systems. We're incredibly stable and dedicated to building the world's first truly decentralised and privacy-focused ecosystem.

- The squid currency network is built with no limits in mind, letting users to earn a living by staking, farming, or adding tokens to the liquidity pool to gain incentives. Allow players to earn squid coins while playing games. We want users to be able to participate in our token without having to trust anyone, while yet maintaining their privacy, security, and liberty.

- Provide an opportunity to earn squid coins while playing games. We want to provide people with the ability to participate with our token without having to trust anybody while preserving their privacy, security, and autonomy.

03. Vision

We aim "cryptocurrency to be in every portfolio." We envision a society in which wealth-building tactics that were previously solely available to the wealthy are made open to everyone, restoring people's control over our financial institutions.

Squid Coin will build a revolutionary gaming ecosystem to attract more people to digital assets. It will create a safe and secure legal crypto online gaming platform that is positioned for global adoption with no limitations, allowing users to earn a handsome income while maintaining their privacy, security, and autonomy.

With the squid currency platform, we want to establish an environment built on reasonable monetary regulations, with a robust and solid decentralised foundation.

04. METAVERS

The squid coin is a virtual world where players can create, control, and monetize their game experiences using squid currency, the platform's utility token, on the Ethereum blockchain.

Our goal is to provide a fully immersive metaverse where players may collaborate to develop virtual worlds and games without the need for a centralized authority. By giving artists actual ownership of their projects as non-fungible tokens (NFTs) and rewarding their participation with our utility token – squid coin – we hope to upset incumbent game makers like Minecraft and Roblox.
The centralized ownership and control of user-generated material in the present game market restricts creative rights and ownership. Players are unable to generate fair value for their creations because of central control over the selling of virtual items made by them. Furthermore, proving creative ownership of works can be challenging, especially as content is copied, edited, and expanded upon.

we are introducing multiverse survival games on this platform. To participate in these games gamers need to buy Squid Coins. Coins of Squid "metaverse survive Games" are now available. Survivors NFTs and Squid coins holders will be able to play the game online. Multiplayer games will be added, with gamers receiving their character special powers in battle based on NFT traits, such as legendary NFT holders receiving the most advanced game character enabled to play the game. The winners of the dual fighting game will receive Squid coins as a prize. Participants have to survive to earn rewards and Squid coins.

05. Global Gaming Industry

Number of active video gamers worldwide from 2015 to 2023

- The video gaming enterprise is big and shows no symptoms of slowing down. While there had been almost a billion video game enthusiasts internationally in 2015, this discern is expected to upward push to over 3 billion game enthusiasts by 2023

.

- The Asia Pacific region is at the heart of the global video game business. According to estimates, there have been over 1.5 billion video game enthusiasts inside the area in 2020, generating a mixed sales of 78.3 billion U.S. Greenbacks. This represents almost double sales in the second largest area, North America. Given how much money a gamer donates to his or her hobbies, it is not surprising that the gaming business is worth billions - international players have spent an average of more than 123 U.S. Dollars on gaming over a 3 month period in 2018, which protected purchases on full games, downloads, and assisting stay streamers.

06. CoreValues

Community

In gaming, it's always been about the community. We want our community to believe in and support our project by obtaining regular updates via squid coin and earning money by holding the coin. Our goal is to take our audience on a journey from conception to completion, including everything in between.

Transparency

For far too long, cryptocurrency ventures have been able to get away with dubious practices and hidden development teams. We want to blow the roof off with crystal-clear objectives, a face for each member of our amazing and ever-growing workforce, and trackable accounts reflecting what we spend through our development wallet.

Stability

We intend to create a stable and growing platform that encourages users to maintain the money in order to receive rewards by utilizing our unique and innovative tokenomics contained in our smart contract. Each of the core development team's wallet addresses will be visible on the website from the beginning, letting anybody examine their transactions at any time.

Fairness

Our free-to-play model, along with our one-of-a-kind environment, will provide the fairest and transparent gaming economy ever seen. You know precisely what you're receiving when you buy something in the game, and it has real-world value. If you wish to, you can always sell your items later for a profit. There will be no more gambling or treasure boxes. What you see is exactly what you get.

07. Staking

squid coin works on the BSC platform, which is eco-friendly, working on a proof of stake BSC staking ensures users' funds are safe by leveraging effective security measures and providing Secure Asset Fund for Users (SAFU). Our staking method at the time of writing is arguably one of the safest and most eco-friendly methods (for cryptocurrency) to earn passive income.

The platform stores all staked coins using a secure wallet and a double-checking system. As more and more people, including institutional investors, realize the crypto market's lucrativeness, crypto staking is fast becoming a trend of earning passive income by simply holding or locking funds in a wallet. Since staking cryptos requires some technical crypto know-how and damming requirements, squid Coin staking platforms come in handy to allow investors, even those without technical knowledge of cryptos, to stake PoS coins and earn rewards. For only a percentage of your staking rewards, the staking platform lends you their technical expertise and validates stakes on your behalf, enabling you to earn passive income. The substantial growth of crypto staking has seen a boom in staking platforms allowing investors to earn staking rewards seamlessly. If you're thinking of making passive income through staking Then squid coin is a fantastic option.

08. benefits of Staking

Sovereign system

8.1 A decentralized global currency complete with an efficient infrastructure

SECURITY

8.2 It has inherent security which is essential to maintaining the integrity of a ledger

High Speed

8.3 It has high speed transaction rate than others that makes him fast and unique than other

LOW FEES

8.4 squid coin runs on BSC which has one very low transaction fees

Uniqueness

8.5 Squid coin is a decentralized token with a NFT focus.

Decentralized

8.6 Data is replicated in a distributed network of nodes, thus eliminating several present risks when data is stored centrally. There is no single point of failure in the case of Squid app.

09. Why Static?

The reflected method successfully enables coin holders to hold their coins   depending on percentages completed and total coins owned by owners. Static rewards play an important part in addressing a variety of issues in order to provide investors with earnings depending on the number of coins exchanged in the market. This method is designed to satisfy early adopters who want to sell their coins after earning high APYs.

This method attempts to relieve some of the negative sell pressure on the coins that have been created by early adopters selling their coins after harvesting insanely high APYs. Second, the reflecting mechanism encourages holders to keep their coins in order to earn greater kick-backs, which are calculated as a proportion of the total coins owned by the owner.

10. Burning

Sometimes burns are important, and sometimes they aren't. In the early days, a continuous burn on a single protocol may be convenient, but it implies the burn cannot be limited or regulated in any manner. Burns that are managed by the team and elevated based on accomplishments assist to keep the community informed and rewarded.

The conditions and proportions of the automatic burn may be marketed and monitored. squid coin intends to execute a long-term burn strategy that is both helpful and gratifying for people who participate. Furthermore, manual burns assist in rewarding and informing the community. The manual burn's circumstances and quantities are publicized and monitored. The burning of squid coin will continue after every transaction. burnt is shown on our website readout, allowing for more transparency in determining the current circulating supply at any one moment.

11. Squid NFT

squid coin NFT is a vital part of our ecosystem dealing with NFT'S. Non-fungible coins (NFTs) are unique, non-interchangeable assets, minted on-chain. squid coin NFT is the Gaming themed series of NFT Creation and trading platforms, Unlike general NFT trading platforms, squid coin NFT will be the decentralized protocol that supports NFT creators, buyers and sellers. These coins can be linked to anything from digital squid coins. The core attributes of NFTs give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given coin are evident without the need for a trusted intermediary. We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectables. squid coin is a widely known NFT project. The underlying coin for each squid coin encodes a unique genome that defines its appearance, traits, and hereditary linage. squid coin cannot be replicated and cannot be transferred without the user's permission.

12. Valuables of NFT

Easily Transferable

12.1

The transfers of NFTs are centred on their uniqueness and indivisibility, thus the coins are sold and purchased on a unique market.

Trustworthy

12.2

NFTs are based on blockchain technologies. Consequently, you must be confident that your NFT is right, as counterfeiting a decentralized and permanent record is difficult.

Ownership Rights

12.3

This is a network of open platforms the size of an NFT, with no buyer having the ability to modify the data later.

13. THE ICO OPPORTUNITY

Imagine the perfect combination of gaming and cryptocurrency which offering Rewards, staking sharing/Buying/Selling under an umbrella

Imagine a place where everyone can Buy, Sell, share, control and manage the game and participate in games.

Imagine an entire chain of blocks, users, data open and free without intermediaries… "This is squid coin"

squid coin aims to open up the Virtual gaming ecosystem based on three massive opportunities by enabling:

- Earning opportunities to everyone without any discrimination.

- Stake, Hold, Buy, or Sell squid coin to earn passive income.

- Enjoy Ownership of coin in shape of rewards.

14. Challenges

Payment Fraud
According to estimates, every genuine virtual transaction results in the loss of 7.5 virtual goods due to fraud. . Manipulation or chargebacks can occur when assets are kept and handled online. Scammers wreak havoc on the game's reputation, and merchants are burdened with additional costs.

High Fees and Slow Transactions
To execute virtual goods transactions, game producers and communities rely on third-party systems. Gamers face delays, a sluggish cash flow, and hefty transaction costs.

Lack of True Ownership & Rarity
In essence, virtual objects are licenced to the player and are frequently only accessible for use on their own platforms. They may be controlled, misplaced, or taken away from the user with no recourse. Genuine transparency is lacking.

Locked in and Centralized
The majority of digital products and currencies are linked to a specific individual and are not transferrable. It's inconvenient and difficult to trade goods outside of the gaming area. If a player is banned, all of their equipment and cash are forfeited.

No open standards
For decentralised money and assets in games, there are presently no generally acknowledged standards. Users have no idea what to expect because the user experience is frequently an afterthought.

Expensive & time-consuming
Creating a platform for managing virtual products takes time and money. Time to market is slowed by the complexity of maintaining a virtual economy on proprietary technology. Additional challenges arise as a result of security considerations.
Lack of value gamification
Content management systems and forum software both lack value-based gamification capabilities. Users are not compensated in real-world currency for their participation or contribution.

15. Token Distribution

All tokens belonging to staking, team, private sale, IDO, advisor, and prize.

Distribution
   10,000,000 SQD

- 30% prize
- 5% adviosr
- 5% staking

16. Tokenomics

SquidCoin(SQD) is a currency that can use inside the Metaverse Survivor game.

Participants (User) should pay for entry and many other benefits on the ecosystem and service benefit.
The audience can also donate their SQD to participants.
Lastly, Users can have prizes with SQD and donated SQD. They can use it for another game or buying products on the metaverse universe.

- **The entry price for entering the game**
- **In-game purchase**
- **A player can be Monetizing from donation and prize**

The company also will generate profit with additional advertisements and IP selling products.
Our company buys and burns SQD to make it stable with that profit.
Making Closed-loop drive SQD value continuously.

17. Token Details

Token Name	Squid Coin
Token Symbol	SQD
Total Supply	10,000,000
Blockchain	Ethereum
Type	ERC-20

18. Roadmap

2021 4Q
- IDO on Uniswap, team building, fund raising

2022 1Q
- developing Global Platform , NFT, Stable Coin announcing

2022 2Q
- Launching global platform, pre-sale of ICO, Beta version of Survior Game

2022 3Q
- ICO, burning portion of SQD

2022 4Q
- launching the survivor game
- Lunching real Global Squid Game

2023 1,2Q
- launching NFT Market

2023 3,4Q
- Offline Survivor Event

2024
- launching VR-based Squid Game
